La diversificazione delle esperienze professionali di industrial design, nella consulenza alle imprese, permette l'elaborazione di sinergie creative e tecniche fra i diversi approcci progettuali, in un'osmosi delle esperienze professionali che consolidano il patrimonio metodologico creativo e culturale - garanzia di un'intervento progettuale innovativo.

The sheer diversification of professional skills involved in an industrial design firm generate important creative and technical partnerships with different approaches to design. These contributions from different professional skills consolidate the firm's methodological, creative and cultural competence, and guarantee innovation in design.

intro

Bruno Cutino

un ci

Dunque l'idea, accostandosi ordina, combinando insieme, le parti diverse di un essere, le riduce a un tutto armonioso e forma l'unità mediante il loro accordo, poiché essa è una e perchè l'essere da lei informato deve essere uno, come può esserlo un essere composto di parti. La bellezza dunque risiede in questo essere, una volta ricondotto all'unità, e si dà a tutte le sue parti e all'insieme.

concept

But where the Ideal-Form has entered, it has grouped and coordinated what from a diversity of parts was to become a unity: it has rallied confusion into co-operation: it has made the sum one harmonious coherence: for the Idea is a unity and what it moulds must come to unity as far as multiplicity may. And on what has thus been compacted to unity, Beauty enthrones itself, giving itself to the parts as to the sum.

Enneads I 6,2 (Plotinus - ca. 204-270 CE)
